

# Highway Report

Jan. 2024!

The December Flood caused some minor damage to some roads. With shoulder washouts and plugged culvert. With the dirt roads soft we had to use our small one ton trucks to carry material. All washouts are <sup>now</sup> repaired.

Some right of way tree removal was done for improved visibility and access to keeping ditches clean.

Side walks and roads were plowed and sanded when needed.

All trucks are fixed and have plows and sanders installed. Sidewalk machines are all working as well.

Still waiting on John Deere Corp. for and answer on the defective transmission for the Grader. Have called the dealer several times. They to are waiting!

Jimie Robke  
Highway Supt.
