

## DISPLAY OF ADDRESS NUMBERS

It shall be the responsibility of every person who owns, uses, or occupies any structure to display address numbers in compliance with the following:

- A number shall be prominently placed on the front (roadside) of every house or structure having a separate address number to be plainly visible and legible from the street or road fronting the property.
- Mailboxes shall be marked with the house/structure number if the box is in front of and on the same side of the street as the house/structure.
- If the house/structure is not visible from the road and no mailbox is beside the driveway leading to the house/structure, a sign or number post shall be erected to display the number. The sign or number post may display the number either vertically or horizontally.
- The structure number must be placed high enough so that it will not be obscured by snow during an average winter.
- The number shall not be allowed to become obscured by trees, brush or otherwise.
- The number shall be Arabic numerals or alphabet letters. Numbers shall be a minimum of four inches high, with a minimum stroke width of 0.5 inches. The color of the numbers shall contrast their background.
